PROFILE SUMMARY

AI Engineering undergraduate at FAST NUCES specialising in **machine learning, deep learning & computer vision, NLP & LLMs** and **knowledge representation & reasoning**. Builds models end to end, from raw data to deployment, with measurable results (**95.0% Recall@1** visual search, **R^2 0.886** price prediction), and ships them as real products with LLM agents, FastAPI, full-stack apps and databases.

EDUCATION

National University of Computer and Emerging Sciences (FAST NUCES) **Expected 2028**
Bachelor of Science in Artificial Intelligence *Islamabad, Pakistan*
Relevant coursework: Machine Learning, Knowledge Representation & Reasoning, Programming for AI, Data Structures, Databases, Operating Systems

AI & TECHNICAL SKILLS

- **Machine Learning:** Supervised & unsupervised learning, feature engineering, evaluation, tuning, SHAP; Scikit-learn, XGBoost, Pandas
- **Deep Learning & Vision:** CNNs, transfer learning, metric learning (triplet, ArcFace), image retrieval; OpenCV, MediaPipe, CLIP, FAISS
- **NLP & LLMs:** LLMs (Llama 3.3, Qwen), prompt engineering, RAG, speech-to-text (Whisper), vector databases (Pinecone)
- **Knowledge Representation & Reasoning:** Propositional & first-order logic, inference & resolution, knowledge graphs, A* search
- **AI Agents & Robotics:** LangChain, CrewAI, n8n, Vapi.ai voice agents, webhooks; ROS 2, Gazebo, ESP32, MQTT
- **Full Stack & Databases:** React, Next.js, Node.js, Express, FastAPI, GraphQL; PostgreSQL, MySQL, MongoDB, stored procedures
- **Languages & Tools:** Python, C++, JavaScript / TypeScript, SQL, Bash; Git, Linux, Docker, Jupyter, Postman

AI & MACHINE LEARNING PROJECTS

SoleMatch: Visual Sneaker Search Engine *(ResNet50, Triplet Loss, CLIP, FAISS, FastAPI)* GitHub
- Fine-tuned ResNet50 with triplet loss over FAISS, lifting Recall@1 from 82.8% (zero-shot CLIP) to **95.0% on 645 held-out queries**.

House Price Prediction: End-to-End ML *(Scikit-learn, XGBoost, SHAP, FastAPI, React)* GitHub
- Engineered ~93K listings, compared 3 models, tuned Random Forest to **R^2 0.886**, explained it with SHAP and served it via FastAPI.

CharaID: Open-Set Character Recognition *(ArcFace, Metric Learning, FAISS)* GitHub
- Trained an ArcFace encoder (512-d embeddings) with a calibrated unknown threshold; new classes need 5 images, no retraining.

Clara: AI Voice Receptionist *(Vapi.ai, LLMs, n8n, Google Calendar)* GitHub
- Voice agent that answers clinic calls, checks live availability and books appointments through natural conversation.

AI Automation Agents & Lead-Gen Pipelines *(n8n, Groq Llama 3.3, Firecrawl, Tavily)* GitHub
- Autonomous LLM agents that scrape target sites, analyse business gaps and draft personalised outreach automatically.

Synapse AI Wearable System *(Whisper, Qwen, A* Search, ESP32)* GitHub
- Wearable sensor network combining Whisper speech-to-text, the Qwen LLM and A* pathfinding for context-aware AI assistance.

Phantom-Key Touchless Interface *(OpenCV, MediaPipe, Tkinter)* GitHub
- Real-time computer-vision controller mapping hand landmarks to mouse, keyboard, presentation and media commands.

Medidash Autonomous Medical Robot *(ROS 2, Gazebo, MQTT)* GitHub
- Autonomous healthcare robot integrating custom hardware with ROS 2 and MQTT for safe navigation.

FULL STACK & SYSTEMS PROJECTS

- **RideFlow Ride-Sharing Platform**: Node.js, Express, MongoDB & SQL app with real-time matching, JWT auth, PKR wallet and SQL triggers. GitHub
- **Systems & 3D Web**: Movie Data Manager (C++ graph of 5,044 movies), Retail Pulse OS (POSIX multi-process pipeline), 3D Anime Chess (React Three Fiber). GitHub

LEADERSHIP, ACTIVITIES & LANGUAGES

- **Team Lead, Civics Project** (FAST NUCES): organised the group, delegated tasks and presented the outcome; managed milestones on team AI projects.
- **Programming for AI Project**, FAST NUCES | **Member**, WOH Society | **Languages:** English (Fluent), Urdu (Native), German (Beginner)
